S	○ for round plug connector M12x1, 4-pole			

**Options**

- Switching ranges for oil or gas
- Special switching ranges/set points
- Soldered copper fitting
- round plug connector M12x1, 4-pole
- for media temperature up to 150°C

**Ordering information**

- Specify direction of flow, medium, and switching range
- For oils, state viscosity, temperature and designation (e.g. ISO VG 68) (enquire about range).
- For gases, state pressure (relative or absolute), temperature and medium (e.g. air) (ranges on request).

**Handling and operation**

**Note**

- Include straight calming section of 5 x DN in inlet and outlet
- Include a filter if the media are dirty (use magnetic filter for ferritic particles).
- It must be ensured that the values given for voltage, current, and power are not exceeded.
- When switched on, a load must be connected in series.
- The electrical details apply to ohmic loads. Capacitive, inductive and lamp loads must be operated using a protective circuit.

**Adjustment**

Loosen the screws on the claming plate, move the contact tube to the required position, tighten the screws again.  
“Normally closed” or “normally open” acc. to the technical data table.
